

# "Color-Right" Dispensing

## Models CR-32, CR-48, & CR-96

### Liquid Dispensing Systems

Just the color you need. Just when you need it.

The CR-32, CR-48, and CR-96 Dispensing Systems dispense liquid, such as ink or paint colorants into any size container and can be equipped with multiple scales to insure proper resolution for the batch size.

---

**As a paint or ink manufacturer, what will dispensing do for you?**

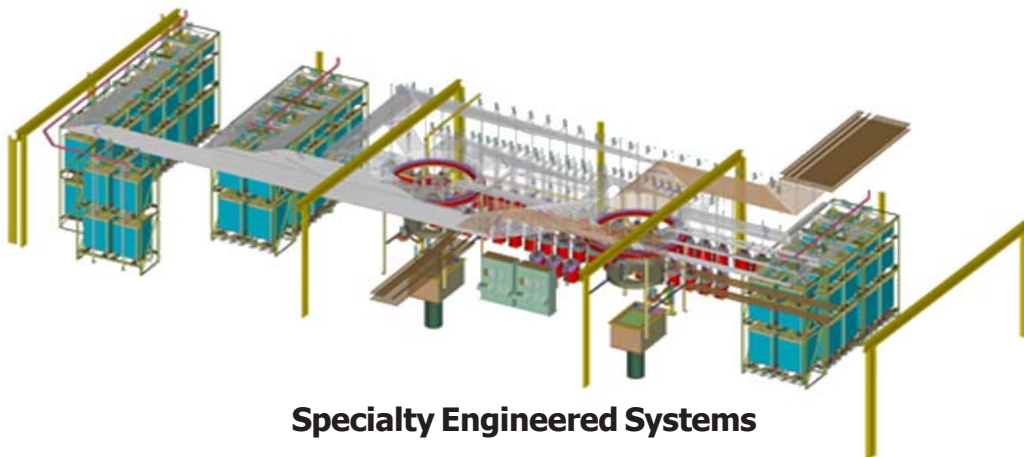

**Reduce Work-In-Process** - Approved colorant formulas will be dispensed correctly the first time.

**Reduce Labor** - Production requirements can be met with less personnel.

**Improve Production Efficiency** - Concentrate on manufacturing larger, more efficient batches of base material rather than labor intensive small batches.

**Improve History Tracking** - Our "Color-Right" Software tracks history with Microsoft Access Databases. A standard set of Crystal Reports are provided and custom reports can be configured easily.

**Improve Customer Confidence** - Your customers will have the confidence that you have taken the steps necessary to meet their delivery demands.

Specialty Engineered Systems

# "Color-Right" Dispensing

## Model CR-32, CR-48, & CR-96 Liquid Dispensing Systems

Automated washing keeps repeatability and accuracy consistent for every dispense

Optional 1-3/8" Valve for high-flow components or  
Standard 3/4" Valve for your component additions

### Return on Investment Considerations:

- Manufacturing in bulk, yields economies of scale
- Reduce QC Steps
- Reduce Work-In-Process
- Avoid measuring errors that cause the batch to scale up beyond the container size
- Respond easily to rush orders
- Respond easily to smaller orders
- Respond faster to order changes
- Reduce Labor
- Improve your competitive advantage
- Improve ISO compliance
- Build customer satisfaction

### **Features**

- Accuracy to 0.1 gram
- 3/4" or 1-3/8" 3-stage valves
- Ideal for in-plant installations
- Cleaning cycle can be preset to clean per schedule or after each batch
- Models available for water or solvent-based components
- Configurable with multiple scales
- Manual override controls standard
- Color Right Formula Production and Management Software is written and supported by CB Mills
