

"Color-Right" Software

For Formula Production and Management
Written and Supported by CB Mills

Just the color you need. Just when you need it.

CB Mills has created a software package with industry-preferred features and an easy-to-use interface to make operation simple. "Color-Right" screen designs are intuitive for all levels of operators and require minimal training.

"Color-Right" provides the end-user with the capabilities to dispense formulas, manage component inventories, track and dispense based on job or batch numbers, customize security levels, manage returns, as well as, control agitation and recirculation schedules and much more.

Other software limits you to a set of predefined reports. "Color-Right" has pre-formatted reports and also allows access directly to the databases. Through Crystal Reports®, users have the ability to create and customize their own reports. This allows for more thorough reporting of dispenses, inventories, costs, and more.

Features

- Easy-to-use Interface
- Superior Formula Design Capabilities
- Track Raw Materials, Dispense Batch Numbers, and Job Numbers
- Manage Hand-Add Ingredients
- Inventory Management
- User Definable Security Levels
- Superior Reporting through Crystal Reports®
- Connectivity to Spectrophotometers, ERP Software, and Mainframe Systems
- Multi-Lingual

"Color-Right" Software

Usability

CB Mills' exclusive "Color-Right" Formula Management Software completely and automatically controls each phase of the dispensing process through easy-to-use screens. "Color-Right" is user friendly and requires minimal operating skills.

Flexibility

"Color-Right" can also be adapted to other dispensing applications. It has the ability to be networked between multiple dispensing systems, directly to a scale for a low-cost hand "weigh-up" system, or to your ERP system for automatic updates of scheduled dispenses and/or any required dispensed information.

Reliability

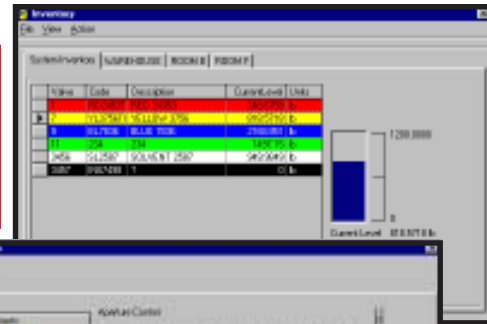

"Color-Right" has been through the rigors of "real-world" around-the-clock dispensing. Because it was designed completely in-house, our support staff possesses first-class knowledge of our software and has the ability to provide world-class support and training.

System Requirements

- Windows 2000/XP
- Beyond Operating System Minimums
- Additional 64 MB RAM (128 Recommended)
- Additional 2 GB Hard Drive Space
- CD-ROM & Floppy Drives

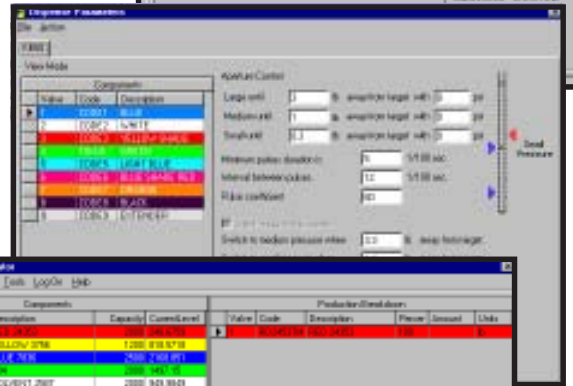

Inventory

Displays the amount of inventory for each component

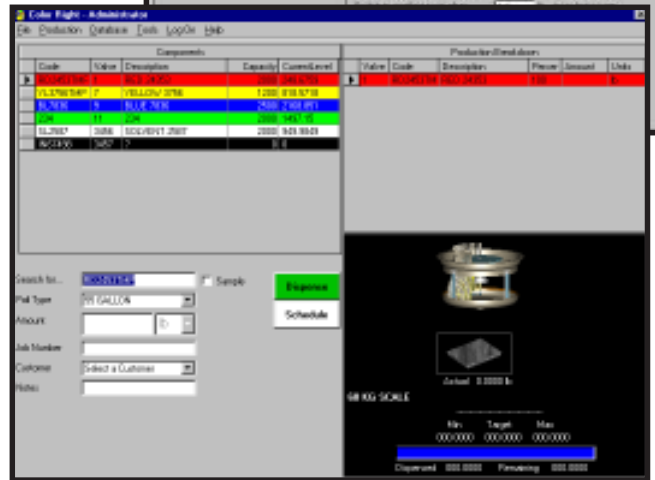

Dispense Parameters

Allows complete control of flow characteristics

Production

- Easy 3-step Dispensing
1. Select Material
 2. Enter Amount
 3. Click 'Dispense'
